Projects

Password Generator | [HTML](#), [CSS](#), [JavaScript](#) | [Live Dashboard](#)

- a simple, user-friendly web application designed to create secure, random passwords. The intuitive interface allows users to specify criteria such as password length and inclusion of password length, uppercase letters, lowercase letters, numbers, special characters and a clipboard. With a click of a button, the generator produces a strong, unique password, enhancing online security and protecting against unauthorized access.

Yayyu E-Commerce | [JavaScript](#), [TailwindCSS](#), [React](#), [NextJs](#), [Shopify](#) | [Link To GitHub Repo](#)

- Developing a user-friendly e-commerce web application designed to help users and prospective clients seamlessly browse and purchase products. The project utilizes modern web technologies such as HTML, TailwindCSS, React, and Next.js, while leveraging Shopify for its e-commerce functionality.

Sunnyside Landing Page | [HTML](#), [CSS](#), [JavaScript](#) | [Live Dashboard](#)

- SunnySide Landing Page is a modern and responsive landing page made using HTML, CSS and JavaScript.

UI Mitra | *JavaScript, TailwindCSS, React, NextJs* | [Link To GitHub Repo](#)

- A modern UI/UX agency website built with Next.js and JavaScript. It features a structured and responsive design, showcasing services, portfolios, and client testimonials. The project emphasizes clean UI, smooth navigation, and an engaging user experience.
